INT.CL. : G11B 15/02 H04N 5/765

TITLE : DIGITAL BROADCASTING
RECORDING SYSTEM

ABSTRACT : PROBLEM TO BE SOLVED: To avoid the inconvenience of video recording of different program other than a desired program without awareness of the user of this fact.

SOLUTION: The system is equipped with a detecting means 17 for detecting whether a signal of a presently selected channel is under recording by a recording device or not upon receipt of a control signal for changing a channel to be selected by a transport decoder 13 from the presently selected channel to a different channel and a warning display means 40 for displaying it detected by the detecting means 17 that the recording device is under recording operation.
